The Elements

Medi-Spa & Beauty

The team at this award-winning beauty and medi-spa remain committed to offering only the latest, most advanced skin technologies available to the industry.

“Discover the Secret”

At the core of The Elements advanced skincare technologies is the triniti™ Skin Series - a specialist level, medically supervised, skin rejuvenation system offering total facial renewal, part of the elōs™ range of treatments.

There are three steps to the triniti™ Skin Series Programme. All three can be performed in one appointment, or as individually required, with virtually no down time.

FotoFacial RF™ Colour Correction is the first step of the triniti™ Skin Series and addresses sun damage, age spots, red vein vessels and uneven skin tone.

ReFirme™ is the second step of the triniti™ Skin Series and addresses the shape of the face, working at improving your skins laxity. The skin becomes tightened, collagen production is stimulated and the appearance of fine lines and wrinkles is diminished.

Matrix IR™ is the final step of the triniti™ Skin Series. This step addresses deep wrinkles, providing focused, remodelling of problem areas. A Fractional Laser is used to treat deep creases and this is particularly ideal if you suffer from crow’s feet, ‘smoker’s lines’ around the lips or marionette wrinkles. The triniti™ Skin Series initiates a natural body re-building response to wrinkle remodelling.

triniti™ Skin Series is the perfect alternative to Appearance Medicine procedures such as Botox and fillers or, if you already receive regular Appearance Medicine treatments, triniti™ Skin Series will lessen the need for these and increase the longevity of their effectiveness.

Colour correction, skin tightening, added hydration and a reduction in the appearance of fine lines and deep wrinkles can all be achieved in a single session with triniti™ Skin Series – a complete skin treatment that offers immediate, visible results!

elōs™ Laser Hair Removal & IPL is now also available at The Elements offering consultations at no charge. In addition to regular skin types, this is ideal for most skin,

Laser Hair Removal is especially suitable for male clients. The treatments are able to cover larger areas very quickly, more so than traditional techniques. elōs™ Laser Hair Removal combines both light and radiofrequency to treat areas, proving to be a superior technology that is safer and more effective than other systems. Book now for your complimentary consultation!

“By making a small investment weekly, you CAN create a new you, it is totally possible! Our prices are affordable and I take pride in offering our clients a high quality service within a beautiful environment.”

- Jude Luke, The Elements Managing Director

Don’t forget your great savings for smooth shapes – laser cellulite reduction session for just \$149.50 on mention of ‘Beautiful You’!
